

## With GIFAS underfloor distribution systems into the Champions League!

The individually configurable underfloor distributor systems are ready for use in a matter of seconds and supply the power tailored to the requirements.

<b>Customer/installation engineer:</b>	St.Jakob Park, 4028 Basel / Hefti, Hess, Martignoni, 5001 Aarau
<b>Requirement:</b>	Electric power supply at different locations
<b>Solution:</b>	Underfloor distribution system (Campetto) with various plug options
<b>Quantity:</b>	4
<b>Areas of application:</b>	football stadiums, towns, marketplaces

### Initial situation

The new built football stadium St.Jakob was planned as multifunctional stadium not only for playing football, also for concerts and other events. This was a big challenge right from the design or planning stage. The electrical power supply had to be assured trough simple an discrete modality.

### Customer benefits

- robust, stainless steel contstruction
- gas spring supported opening mechanism
- lockable also when the connectors are plugged-in
- special cable outlet aperture
- customized plug an socket outlet assembled with FI safety sockets
- additional box component for belated installation of microphones or speakers
- extremely resilient cover (accessible for cars and lorries)
