

Elegant garden lighting thanks to VisuLED HOME

Very stylish illumination of gardens and parks

Customer/installation engineer:	Private house in Grub AR/Hochreutener Elektro AG in Grub AR
Requirement:	low voltage garden lighting
Solution:	VisuLED HOME
Article:	VisuLED HOME (Item no. 860106/860104)
Quantity:	20
Areas of application:	Biotope, garden lounge, attractive accent lighting

Starting situation

The old 230 volt garden lighting no longer showed the beauty of the plants and the biotope.

The customer also wanted the lighting to be extended to the spruce forest. The VisuLED HOME, offers an attractive, dimmable garden and park illumination. The connecting cables were laid in pipes directly in the soil of the flower beds, in order to protect the feed-in cables from rodents. VisuLED HOME can be used as a ceiling, wall or floor installation.

Customer benefits

- very low power consumption
- long lifetime
- visible no feed-in cables
- reliable IP 68 connection system
- personal protection through low voltage
- dimmable
